

Configuring NIC for Multiple IP's

Version 1.0

03-05-2002

Multinetting Summary

With the recent addition of statewide Private IP ranges, districts may find it necessary to assign an additional IP (Private IP) to each servers NIC card in addition to the existing Public IP. To accomplish this, complete the following process.

1. From the desktop at each server right click on Network Neighborhood.

2. Click on Properties

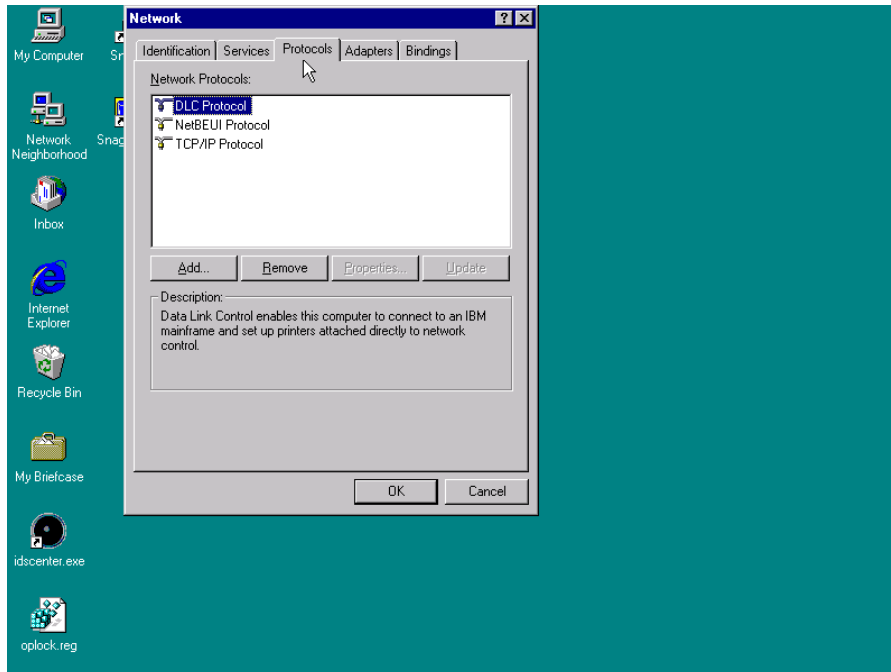

Configuring NIC for Multiple IP's

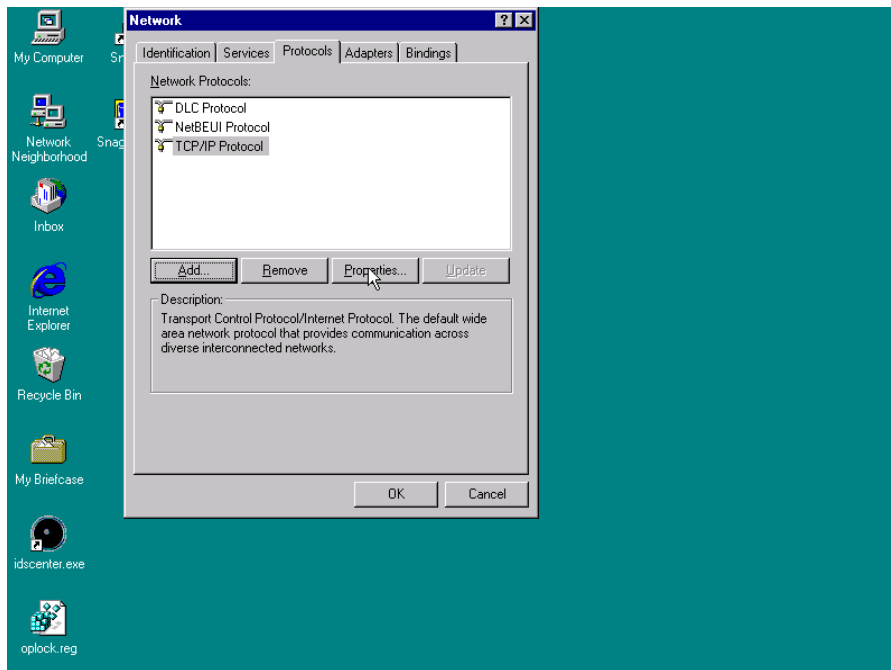

Version 1.0

03-05-2002

3. Click on the Protocols Tab

4. Highlight TCP/IP Protocol and click the Properties Button
